

## > Steel-Copper Power Conducting Arms

We are pleased to thank **Hormozgan Steel** delegation which recently assisted to the successfully factory cold tests of the Steel-Copper Power Conducting Arms.

Hormozgan Steel decided to partner with Brar once again, confirming a long term cooperation started many years ago and thanks to the great performances of the Steel-Copper power conducting arms previously supplied. The scope of supply included the design and manufacturing of Steel-Copper power conducting arms for Electrode 24”.

## > Aluminium Power Conducting Arms

As previously informed, **NIKKO** successfully got the Final Acceptance Certificate at **Dahean Steel** Busan 80t EAF, equipped with Aluminium Power Conducting Arms by BRAR.

Production increased, tap to tap time have been shorten from 49 to 46min and power consumption decreased of 10kWh/ton.

Congratulation to Nikko staff for the great results!

## > Secondary High Current System

**Çebitaş Steel Turkey** is a leader in steel billets and deformed bars production and one of the 100 largest companies in Turkey.

Çebitaş Steel and Brar started their first cooperation more than 30 years ago and thanks to the good relationship and performances of our products, we are pleased to cooperate again on a new project. The contract scope of supply consists in the design and manufacturing of new Secondary high current system which will be suitable for 2 different transformers by a simple assembly of an adaptation with flanged connections.

Below pictures of the secondary system for the 2 different transformers.

Picture on the right has been shot during of our recent visit at Çebitaş, inside the LF transformer room where is assembled the secondary circuit supplied by Brar ***more than 30 years ago!***

## > Lal: Keep Calm and enjoy Retirement

*We would like to congratulate **Lal Harbans** on your retirement from BRAR. We enjoyed working with you during your time here and wish you the best in your future endeavors.*

*Hope you have a fun and fruitful retirement.*
