The new web app to
manage and monitor the
performances of water-
cooled cables of your
furnace.

High-current leader

Doctor Cable is a new web application to manage and monitor the performances of the Water-cooled cables on electric arc furnace. The application allows the performance monitoring, management, troubleshooting and analyzing of water-cooling cables.

You can now track the cable longevity, monitor the resistance of the cable, prevent cable mis-replacement, prevent furnace downtime, schedule preventive maintenance.
 → Save money and time.
